Testimonial for Bertram Construction

In the past several years, I have worked on 2 significant construction projects that Bertram Construction has been the general contractor on. The first was a 185,000 square foot warehouse construction project. Bertram Construction provided assistance with the initial plans, secured and managed all on site contractors and provided on site supervision throughout the entire project. The timelines were tight, through winter construction which was very challenging, but the project was delivered on time and on budget.

The second project was a 18,500 square foot expansion, which had many challenges because due to the time constraints of 5 months. The design of the expansion and securing of sub trades was done in a multi stepped timeline. Bertram Construction did an incredible job facing enormous challenges and complex design. Dealing with not only myself representing the owner of the building, but the tenants (from outside Canada) who would ultimately fund the project. Bertram's asked the pertinent questions, kept the subtrades, tenants and others on task, came up with unique and timely recommendations and provided excellent project management. This project was delivered on time and on budget, notwithstanding the significant handicap of timing for this overall project.

It has been my sincere pleasure to work with such a professional, dedicated company, from the owner, Lisa, to her supervisory staff on site and her great team in the office managing the sub trades and project management.

Respectfully,

Laurie Waldrum, CPA, CGA
